

# Community TREE PLANTING event for the villages of Pill, Easton-in-Gordano and Ham Green

Together we can make positive change and help tackle the climate crisis.  
**Over 100 new trees** can be planted across a patchwork of local gardens.  
Attract wildlife, feed the birds and yourself!

With thanks to the Community Forum and Brackenwood Garden Centre

**100** young self-fertile native hazel tree whips  
**Will be given away for FREE**  
plus bare root fruit trees (traditional varieties of  
Plum, Greengage and Pear) will be available to  
**purchase at COST PRICE!**  
One tree per household, while stocks last

Each tree is precious and will have its own story to tell.  
We will ask for photos and stories to publish in the summer to  
**celebrate the impact our small actions can make to create a better environment  
for future generations.**

**In time these mature small trees will capture carbon and clean our air**

Select and collect your tree from the  
**Community Centre in Pill on Saturday 25th January at  
the Pill community market 10 - 12** (first come first served)

Advice and planting instruction leaflets provided. Stakes, ties & tree guards also  
available to purchase at cost price. If you don't know a place where you can plant your tree, then join  
us in the afternoon at Jenny's meadow beside Avon View in Pill to plant any leftover hazel whips  
around the edges.

Celebrate all things nature and wildlife with many local organisations and charities  
joining us to promote a wide variety of ways to get involved and make a difference.

**FREE FUN** for children with colouring activities,  
**Hedgehog Rescue, bird table building and games.**  
**PLUS, Blue hearts decorating: to promote the national  
BLUE Campaign: to signify the wild spaces in our gardens.**
